Projects

VisionMark | *TypeScript, Tailwind, Flask, Express, Python* **Aug' 2025-Present**

- Built a **facial-recognition attendance system** that accurately **matches** student faces against a database of 100+ images.
- Achieved automated present/absent marking with a fast-processing speed of **2.2 seconds per frame**, boosting efficiency by **85%**.
- Implemented a reliable **ML-based** pipeline with real-time detection, secure data logging, and smooth workflow integration.
- **Repository Link: https://github.com/Ram9219/ClassConnect-Automated-attendance-system**

Binary Tree Balance Checker | *HTML, Tailwind CSS, JavaScript, DSA Algorithm* **Jul' 2025**

- Developed a **Binary Tree Balance Checker** that determines whether a tree is height-balanced using optimized recursive algorithms.
- Implemented efficient **height and balance computations** with O(n) time complexity for improved performance on large datasets.
- Enhanced reliability by adding modular test cases, edge-case handling, and clean, reusable **DSA-based code structure.**
- **Repository Link: https://github.com/Ram9219/Balance-Checker**

Farmers-Portal | *HTML, Tailwind CSS, JavaScript, MySQL, PHP* **Apr' 2025**

- Developed a web-based Farmer Portal enabling farmers to browse and purchase seeds, pesticides, and agricultural equipment, with **integrated home delivery functionality**.
- Designed a **responsive UI** with Tailwind CSS and implemented **100 % client-side interactivity** using JavaScript.
- Built **secure backend** with PHP and MySQL for user authentication, item management, and real-time bidding logic.
- **Repository Link: https://github.com/Ram9219/Portal-for-farmers-to-sell-the-produce-at-a-better-rate**

Training

Mastering in Data Structure Algorithm | *Certificate* **Jul' 2025**

- Applied **advanced algorithm principles** to design and implement efficient data organization and manipulation strategies
- **Interactive Visualizer Development** Led **two hands-on projects**: a **BST CRUD** operation visualizer and a **BST height/balancing visualizer**, demonstrating practical expertise in core DSA concepts and effective data structuring.
- **Knowledge Gained**: Strong understanding of DSA fundamentals, time–space complexity, and efficient coding practices in C++.

Certificates / Certifications

Creating Responsive Web Pages using Bootstrap 4 **Jun' 2025**
Infosys — Certificate Link

Angular Web Developer Certification **Jun' 2025**
Infosys — Certificate Link

The Complete Full-Stack Development Bootcamp **Jan' 2024**
Udemy — Certificate Link

Skills

Languages: C, Python, C++, Java, JavaScript, PHP, MYSQL, MongoDB

Technologies/Frameworks: HTML, CSS, React JS, Node JS, Git, GitHub, Ubuntu, Postman

Domain Skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design

Education

Lovely Professional University **Aug' 2023-Present**
Bachelor of Technology - Computer Science and Engineering — CGPA: 7.7 *Phagwara, Punjab*

Saraswati Vidya Mandir School **Mar' 2022**
12th — Percentage: 74% *Uttar Pradesh, India*

I.I.H.S.E School **Mar' 2020**
10th — Percentage: 84% *Sultanpur, Jaipalpur*
